

Training in Transport Modeling and Simulation

Image: © Wolfgang Scherr

Throughout 30 years of his career Wolfgang Scherr has trained over 500 practitioners and students in various topics of transport modeling: macroscopic and microscopic models, trip-based and tour-based travel demand models, activity- and agent-based models, assessment of road and public transport projects, and passenger demand forecasting.

Services Provided by MOVENTES:

- Certified Trainer PTV Visum
- Standardized trainings with the PTV Visum software. Topics: Four-stage-models, tour-based models, road traffic simulation and assignment, public transport modeling and service evaluation
- Customized training based on clients' needs
- Project support and hands-on training based on data and issues the client is currently working on
- Lectures and seminars on topics in the fields of transport modeling and traffic simulation

Project Owning Entities

Government agencies, universities, public transport agencies, engineering firms

Years of Practice

1995-2024

Countries

USA, Canada, France, Germany, Switzerland, Spain
